

Discover the exciting world of Airbus

Aircraft manufacturing up close: Gain fascinating insights into the production and assembly of Airbus aircraft during an Airbus factory tour. Globetrotter Erlebnis GmbH is the exclusive service provider for these Airbus factory tours.

Board our tour bus and head straight onto the Airbus site. Accompanied by commentary from our experienced tour guides, you will experience the manufacturing process up close from a unique vantage point. Watch the structural and final assembly stages and see how individual components come together to create one of the world's most modern aircraft.

AIRBUS IN HAMBURG

Werkstour Let's visit Airbus

Prices & Information
As at August 2026

Airbus Hamburg

With a workforce of more than 18,000, Airbus is one of Hamburg's largest employers and providers of vocational training. Key areas of development include cabin and fuselage design and testing, as well as related research and development.

The forward and rear fuselage sections of all Airbus civil aircraft are assembled and fitted out at this site. This includes the A350 XWB, the latest Airbus product, which is composed of 53% carbon-fiber composite materials. Hamburg is one of three sites for the final assembly and delivery of the A320 family, Airbus's most successful product. The new A321XLR long-range jet is also built here in Hamburg.
